TnTech CompClub CCDC Mock 1 Final Report Inject

Title: Network Diagram Inject

Tasking:

Hello IT Department,

Thank you so much for your work today. I am delivering a statement to the board of directors regarding the state of our network. As you know, you were brought in to replace the old IT team. I am looking for a written report detailing the state of the network: what's running (and what versions), what potential security issues you're seeing, any observed malicious activity, what you've done to fix it, and any future actions you recommend.

Of course, honesty is always what's expected – but I want to emphasize please do not sugarcoat things. If things are good, please report that. If things are bad, please report that. Please end on a positive note, including what you've done to fix it. The report should be technical and include screenshots of systems and errors. However, there should be an executive summary that is accessible to… executives!

Thank you,

Bruce Wayne

Scoring:

To meet the requirements of this task, you will need to submit a detailed final report, formatted either as a **.docx** or **.pdf**, by **5:00 PM CST** to the scoreboard.
